

How long does it take to produce a silver solution?

The SilverLungs Generator can produce 1.1 liters of a 10 PPM concentration of silver in about 3 hours and a 20 PPM concentration in about 4 hours.

The SilverLungs Generator also features a magnetic stirring system, polarity reversal, sealed production chamber, silent operation, multiple concentration settings and automatic shut-off function. There is also a provided protocol for controlling the ratio of ions vs. particles for optimizing your solutions specifically to the area you wish to target.

These statements have not been evaluated by the FDA. While we present information suggesting benefits of colloidal/ionic silver, we cannot in any way recommend that you attempt to treat yourself with our devices or solution except under the guidance of a physician, and that you never seek to use silver-based supplements from any manufacturer as anything other than an adjuvant to conventional medical care. We do not seek to diagnose or treat any medical condition, only to provide the highest quality products and silver supplements in a marketplace saturated with solutions and devices spanning the full spectrum of quality, workmanship, and safety. Although we do not want to deter you from using silver-based products and supplements, health and wellness should be approached with a level head and plentiful information. We encourage you to consider the research and articles provided on our web site and to discuss the potential benefits of silver with your physician as an adjuvant to your current health regimen. To ensure that you and your doctor can make the best decisions regarding your health and well-being, we are happy to provide additional information to consumers and healthcare professionals alike.
