

Why silver?

Spanning well over 100 years of research, countless laboratory tests have shown silver to kill disease-causing pathogens, viruses and bacteria typically within minutes of contact. Silver has been shown to be a powerful anti-fungal, anti-germicidal, anti-bacterial and anti-viral substance.

Silver is still used readily in hospital burn wards to effectively prevent scar tissue through the use of silver-infused bandages. Ionic silver has been shown to regenerate skin tissue by allowing the restructuring of wounded cells into new cells with no differentiation. Silver assists these wounded cells by allowing them to turn into any type of cell that's needed for optimal healing.

These de-differentiated cells can be used to create the cells necessary to replace destroyed cells in a wound or to simply rebuild missing tissue. It is this very action that allows silver to virtually eliminate scarring.

Silver's ability to work against pathogenic agents is due to silver being a transition metal. Transition metals assist the chemical process of oxidizing other elements. Silver - as a catalytic oxidant - works in this fashion against viruses, pathogens, fungus and bacteria.

Silver is one of the least toxic metals for human ingestion.

These statements have not been evaluated by the FDA. While we present information suggesting benefits of colloidal/ionic silver, we cannot in any way recommend that you attempt to treat yourself with our devices or solution except under the guidance of a physician, and that you never seek to use silver-based supplements from any manufacturer as anything other than an adjuvant to conventional medical care. We do not seek to diagnose or treat any medical condition, only to provide the highest quality products and silver supplements in a marketplace saturated with solutions and devices spanning the full spectrum of quality, workmanship, and safety. Although we do not want to deter you from using silver-based products and supplements, health and wellness should be approached with a level head and plentiful information. We encourage you to consider the research and articles provided on our web site and to discuss the potential benefits of silver with your physician as an adjuvant to your current health regimen. To ensure that you and your doctor can make the best decisions regarding your health and well-being, we are happy to provide additional information to consumers and healthcare professionals alike.
